St. James's Place Conservative Growth Unit Trust

Report of the Manager

The Report of the Manager consists of The Trust, Investment Objectives & Policy, Assessment of Performance, Responsible Investment, Risk and Reward Profile, Investment Adviser's Comments and Portfolio Statement.

The Trust

St. James's Place Conservative Growth Unit Trust is an authorised Unit Trust scheme under section 243 of the Financial Services and Markets Act (2000) and is constituted by a Trust Deed dated 22 June 2017.

The Unit Trust is subject to the rules of the Financial Conduct Authority's Collective Investment Scheme Sourcebook and is classified as a UCITS Scheme.

Investment Objectives & Policy

The objective of the Scheme is to achieve capital growth over the medium term.

The Scheme will aim to achieve this objective by investing primarily in collective investment schemes managed by the Scheme's Manager. The Scheme may also invest in other collective investment schemes (which may include exchange traded funds) which are not managed by the Scheme's Manager as well as in cash for ancillary purposes and derivatives and forward transactions for hedging purposes only.

The underlying collective investment schemes are predominantly invested in UK, North American and other international assets, including fixed interest securities and index linked bonds issued by companies and governments, shares and alternative assets strategies. They may also be permitted to invest in derivatives and forward transactions for the purposes of investment and for the purposes of efficient portfolio management (including hedging).

The Scheme aims to avoid large fluctuations in value, although fluctuations in value will occur.

It is the Manager's intention that the assets of the Unit Trust will be invested so that the Unit Trust will be eligible for inclusion in an ISA.

Assessment of Performance

Due to the nature of the assets held in the Trust, the Manager suggests reviewing the performance over a minimum 5-year period to reflect the fact that it is intended to be a medium to long term investment.

In the assessment of performance, it is important to understand how the Trust's return has been achieved, the level of risk taken, or avoided, and the outcomes of the decisions taken by the Investment Adviser. The "Investment Adviser's Comments" section below may provide helpful material to support this assessment.

Unitholders can also refer to the combination of 35% MSCI All Countries World Index and 65% Bloomberg Multiverse GBP Hedged Index as context in assessing the performance of the Trust, because that provides an indication of the markets in which the Trust invests.

Responsible Investment

We assess how the Investment Adviser considers material climate risks and opportunities within their decision making. We disclose the environmental impact for all our unit trusts in our annual composite Task Force on Climate-related Financial Disclosures Product Report available on <https://www.sjp.co.uk/products-and-services/investment/responsible-investing>.

Risk and Reward Profile

The synthetic risk and reward indicator for the St. James's Place Conservative Growth Unit Trust, as disclosed in its most recent Key Investor Information Document (KIID), is a 4. It was calculated using performance data up to 16 February 2024.

The risk category is recalculated weekly and during the year under review, the risk category did not change.

Report of the Manager

Investment Adviser's Comments (Blackrock Investment Management (UK) Limited - 15 August 2024)

The global equity market performed well despite volatility triggered by higher-than-expected inflation numbers. Inflation trended towards the US Fed's target rate as the period ended, signalling optimism for rate cuts in 2024. Asian equity markets have rallied well with Taiwan and India leading the way. A surprise interest rate cut by China also spurred optimism.

The fund delivered positive returns in sterling terms during the period. As an asset class, fixed income was unable to ride on the positive market momentum due to concerns that inflation will be staying higher for longer. High yield bonds performed better relative to sovereign and investment grade bonds. Global equities provided healthy momentum, and Asian equities have seen a strong recovery. The allocation to Asian equities has benefited from this recovery.

Both the St. James's Place Corporate Bond Unit Trust and the St. James's Place Diversified Bond Unit Trust benefitted from overweight positions in high yield bonds. US equities did well over the period, and the St. James's Place Global Equity Unit Trust, which has a material allocation to US equities, was a positive contributor to performance. The St. James's Place Asia Pacific Unit Trust has recovered strongly from a challenging year before. Value-oriented strategies, such as the St. James's Place Global Value Unit Trust provided a positive return over the period.
