C.7 Any other information	17		

Introduction

This Solvency and Financial Condition Report (SFCR) has been prepared in line with the requirements of the Solvency II (SII) Regulations, to assist clients of the St. James's Place Group (the Group) and other stakeholders in understanding the nature of our business, how it is managed, and its solvency position.

This is a single SFCR that incorporates consolidated information at the level of the Group, and solo information for the subsidiary insurance undertakings located within the European Union: St. James's Place UK plc (SJPUK) and St. James's Place International plc (SJPI). This report is prepared in compliance with rule modification 5272800 granted by the PRA with effect from 1 January 2020.

Relevant information about the business of our Group is provided in the Group's Annual Report and Accounts for the year ended 31 December 2019 (the Report & Accounts), a copy of which can be found at www.sjp.co.uk/shareholders/reports-presentations-and-webcasts/2020. Where appropriate we will refer readers to that document.

There are, however, certain specific SFCR requirements which are not already reported publicly elsewhere, and those are specifically included in this report. In particular this report includes full reporting of the SII valuation undertaken at 31 December 2019, and the associated capital position for our Group. Those results are also presented in quantitative reporting templates (QRTs), and the Group's and its solo insurance undertakings' submissions can be found in the Appendix to this report.

Summary

St. James's Place plc is an award-winning wealth management company. Clients of St. James's Place have access to a range of financial solutions, including the provision of funds and expert advice regarding building investment portfolios, retirement planning, managing intergenerational wealth and ensuring financial protection. Advice is provided by the St. James's Place Partnership, a 4,271-strong workforce of self-employed advisers, with whom we enjoy a close relationship.

We aim to be the most trusted brand in UK wealth management, and focus on doing 'the right thing' for our clients.

The Group provides insurance-based investment and pension products, mainly to UK clients, through two key subsidiary companies – St. James's Place UK plc (SJPUK), which is based in the UK and St. James's Place International plc (SJPI) which is based in Dublin. The Group also provides insurance-based investment products to a small but growing number of clients, mainly ex-patriates, in Asia through a branch of SJPI based in Singapore and a subsidiary of SJPUK based in Hong Kong.

The Group also provides unit trusts and discretionary fund management.

Our Business

Our financial business model remains straightforward and unchanged. We attract and then retain funds under management on which we will receive an annual management fee. We use this income to meet our overheads and to invest for the future.

2019 was a challenging year, but nevertheless one of resilient new business performance. The level of political uncertainty throughout most of the year particularly impacted the pace of discretionary investment flows as some clients took a more cautious approach to investing new funds. Discretionary investment aside, we saw continued net inflows throughout the year as clients sought to consolidate investments through St. James's Place and make use of their tax allowances. As we have seen in similar periods historically, client retention remained strong as our advisers worked hard to provide reassurance and sound counsel in an uncertain environment.

Insurance Funds Under Management (FUM) in the Group and individual entities grew over the year as follows:

£'Billion	SJP Group		SJPUK*		SJPI	
	2019	2018	2019	2018	2019	2018
Opening FUM	68.34	64.46	61.34	57.47	7.00	6.99
Gross inflows	10.94	11.17	10.22	10.45	0.72	0.72
Outflows	(4.17)	(3.71)	(3.76)	(3.37)	(0.41)	(0.34)
Investment return	8.95	(3.58)	7.98	(3.21)	0.97	(0.37)
Closing FUM	84.06	68.34	75.78	61.34	8.28	7.00

* Figures for SJPUK include closing funds under management of £0.12 billion (2018: £0.06 billion) in a subsidiary life insurance company based in Hong Kong.

Most of the Group's insurance business is investment-related. However, both SJPUK and SJPI have small legacy books of protection business, which are substantially reinsured with highly-rated EU-based reinsurance companies.

The Group has an additional £32.93 billion (2018: £27.21 billion) of FUM within its unit trust and discretionary fund management companies.

More information about our business can be found in Section A of this report.

Risk Management

The Group Board and the Boards of the insurance entities have responsibility for assessing the main risks affecting the business, and these are monitored on a regular basis.

There have been no significant changes in the principal risks for the Group in the past year. Brexit continued to dominate the UK political and economic environment, although the result of the December 2019 election has provided a more stable domestic political environment. However, the ongoing Brexit process continues to create uncertainty to our business and the wider economy. Whilst we still believe the direct impact on our operations will be limited, the indirect impact on the economy and client sentiment still cannot be determined with any precision. Although these risks remain outside of our control, we remain focussed on understanding the degree to which the various outcomes might impact the business to allow us to consider how they might be mitigated.

The key risks that could impact on the profitability of the Group's insurance businesses are:

- **Market Risk:** A reduction in funds under management owing to market shocks, poor market performance or currency and exchange rate movements would reduce future annual management charges, and hence future profits.
- **Lapse Risk:** Similarly, a reduction in funds under management owing to higher withdrawal rates would reduce future annual management charges. This may arise from factors such as changes in the economic climate, poor investment performance, competitor activity, or reputational damage to the Group.
- **Expense risk:** Higher expenses would reduce future profits.
- **Operational risk:** Losses from operational risk events, such as a product failure, failure of a Third-Party Administrator or a significant cyber attack could result in one-off operational losses reducing future profits, as well as wider reputational damage which could impact on client retention.

Summary continued

Although these risks may impact on the future profitability of the Group, they do not have a significant impact on our ability to meet contractual payments to clients. Our investment business is managed on a 'unit-linked' basis, where we hold assets which match our clients' investments, ensuring that we are always able to meet clients' withdrawal requests in line with their product's Terms and Conditions.

The low risk nature of our business also means that our Solvency Ratio remains resilient to changes in the business.

More information about the risks that the business faces, and how we manage them, can be found in Section C of this report.

Our Solvency Position and Capital Management

We continue to manage our balance sheet prudently to ensure the Group's solvency, and that of its subsidiary entities, is maintained safely through the business cycle. We hold assets which match our clients' unit liabilities, and the remaining assets in the insurance companies are invested in high quality, liquid assets – typically AAA rated money market funds.

Each subsidiary company holds capital which is sufficient to cover any regulatory requirements together with an additional margin which can absorb adverse future changes. The Group's solvency position assessed on the UK and EU regulatory basis, known as "Solvency II", is shown in the following table:

Solvency (£m)	SJP Group		SJPUK		SJPI	
	2019	2018	2019	2018	2019	2018
Solvency II Own Funds (A) ¹	4,147	3,507	3,428	2,820	200	156
Solvency Capital Requirement (B)	3,148	2,447	2,926	2,259	139	111
Solvency II Free Assets (A – B)	999	1,060	502	561	61	45
Solvency ratio (A/B)	132%	143%	117%	125%	144%	141%
Foreseeable dividend (C)	167	157	200	210	–	–
Post-dividend solvency ratio (A-C)/B	126%	137%	110%	116%	144%	141%

¹ Before payment of final dividends, as presented in Group Report and Accounts.

Political uncertainty through the year led to significant volatility in risk-free interest rates, upon which the Solvency II valuation is based, with 10-year gilt rates falling below 0.5% at points during the second half of the year. The unit-linked nature of the Group's business limits its exposure to such movements, and the Group and its insurance subsidiaries maintained Solvency II Own Funds in excess of their Solvency II Capital Requirement throughout.

More information about our approach to the solvency valuation and capital management can be found in Sections D and E of this report.

Our Systems of Governance

The Group Board is collectively responsible for the long-term success of our business, and a number of key governance, strategy, planning and risk management processes operate at a Group level. However, key matters must also be considered directly by the relevant entity Board(s).

SJPUK has been subject to the Senior Manager & Certification Regime (SM&CR) for dual-regulated insurers since 10 December 2018.

The FCA solo-regulated entities within the Group transitioned to SM&CR on 9 December 2019. Other than this there have been no material changes in the system of governance during the year.

More information about our system of governance can be found in Section B of this report.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the SFCR in accordance with the Prudential Regulatory Authority (PRA) rules and SII Regulations. The PRA Rulebook for SII firms in Rule 6.1(2) and Rule 6.2(1) of the Reporting Part requires that the Group must have in place a written policy ensuring the ongoing appropriateness of any information disclosed and that the Group must ensure that its SFCR is subject to approval by the Directors.

Each of the Directors, whose names and functions are listed in the Board of Directors section of the Report & Accounts are satisfied that:

- (a) Throughout the financial year in question, the Group and its solo insurance undertakings have complied in all material respects with the requirements of the PRA rules and SII Regulations as applicable; and
- (b) It is reasonable to believe that, at the date of the publication of the SFCR, the Group and its solo insurance undertakings continue so to comply, and will continue so to comply in future.

By Order of the Board

CRAIG GENTLE
Chief Financial Officer
26 February 2020

Auditors' Report and Opinion

Report of the external independent auditors to the Directors of St. James's Place plc (the Company) pursuant to Rule 4.1 (2) of the External Audit Part of the PRA Rulebook applicable to Solvency II firms

Report on the Audit of the relevant elements of the Single Group-Wide Solvency and Financial Condition Report

Opinion

Except as stated below, we have audited the following documents prepared by the Company as at 31 December 2019:

- The 'Valuation for solvency purposes' and 'Capital Management' sections of the Single Group-Wide Solvency and Financial Condition Report of the Company as at 31 December 2019, **(the Narrative Disclosures subject to audit)**; and
- Group templates S.02.01.02, S.23.01.22, S.25.01.22 and S.32.01.22 **(the Group Templates subject to audit)**; and
- Company templates S.02.01.02, S.12.01.02, S.23.01.01, S.25.01.21 and S.28.01.01 in respect of St. James's Place UK plc and St. James's Place International plc **(the Company Templates subject to audit)**

The Narrative Disclosures subject to audit, the Group Templates subject to audit and the Company Templates subject to audit are collectively referred to as the **'relevant elements of the Single Group-Wide Solvency and Financial Condition Report'**.

We are not required to audit, nor have we audited, and as a consequence do not express an opinion on the **Other Information** which comprises:

- The 'Summary', 'Business and performance', 'System of governance' and 'Risk profile' elements of the Single Group-Wide Solvency and Financial Condition Report;
- Group templates S.05.01.02 and Company templates S.05.01.02 and S.05.02.01;
- The written acknowledgement by management of their responsibilities, including for the preparation of the Single Group-Wide Solvency and Financial Condition Report **(the Responsibility Statement)**;
- Information which pertains to an undertaking that is not a Solvency II undertaking and has been prepared in accordance with PRA rules other than those implementing the Solvency II Directive or in accordance with an EU instrument other than the Solvency II regulations **(the sectoral information)** as identified in the Appendix to this report.

To the extent the information subject to audit in the relevant elements of the Single Group-Wide Solvency and Financial Condition Report includes amounts that are totals, sub-totals or calculations derived from the Other Information, we have relied without verification on the Other Information.

In our opinion, the information subject to audit in the relevant elements of the Single Group-Wide Solvency and Financial Condition Report of the Company as at 31 December 2019 is prepared, in all material respects, in accordance with the financial reporting provisions of the PRA Rules and Solvency II regulations on which they are based, as modified by relevant supervisory modifications.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) including ISA (UK) 800 and ISA (UK) 805, and applicable law. Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the relevant elements of the Single Group-Wide Solvency and Financial Condition Report* section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the Single Group-Wide Solvency and Financial Condition Report in the UK, including the FRC's Ethical Standard as applied to public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

ISAs (UK) require us to report to you where:

- the Directors' use of the going concern basis of accounting in the preparation of the Single Group-Wide Solvency and Financial Condition Report is not appropriate; or
- the Directors have not disclosed in the Single Group-Wide Solvency and Financial Condition Report any identified material uncertainties that may cast significant doubt about the Company's ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the Single Group-Wide Solvency and Financial Condition Report is authorised for issue.

We have nothing to report in respect of the above matters.

However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Company's ability to continue as a going concern. For example, the terms of the United Kingdom's withdrawal from the European Union are not clear, and it is difficult to evaluate all of the potential implications on the Company's trade, customers, suppliers and the wider economy.

Emphasis of Matter – Basis of Accounting

We draw attention to the 'Valuation for solvency purposes' section of the Single Group-Wide Solvency and Financial Condition Report, which describe the basis of accounting. The Single Group-Wide Solvency and Financial Condition Report is prepared in compliance with the financial reporting provisions of the PRA Rules and Solvency II regulations, and therefore in accordance with a special purpose financial reporting framework. The Single Group-Wide Solvency and Financial Condition Report is required to be published, and intended users include but are not limited to the Prudential Regulation Authority. As a result, the Single Group-Wide Solvency and Financial Condition Report may not be suitable for another purpose. Our opinion is not modified in respect of this matter.

Auditors' Report and Opinion continued

Other Information

The Directors are responsible for the Other Information.

Our opinion on the relevant elements of the Single Group-Wide Solvency and Financial Condition Report does not cover the Other Information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the Single Group-Wide Solvency and Financial Condition Report, our responsibility is to read the Other Information and, in doing so, consider whether the Other Information is materially inconsistent with the relevant elements of the Single Group-Wide Solvency and Financial Condition Report, or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the relevant elements of the Single Group-Wide Solvency and Financial Condition Report or a material misstatement of the Other Information. If, based on the work we have performed, we conclude that there is a material misstatement of this Other Information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Directors for the Single Group-Wide Solvency and Financial Condition Report

The Directors are responsible for the preparation of the Single Group-Wide Solvency and Financial Condition Report in accordance with the financial reporting provisions of the PRA rules and Solvency II regulations, which have been modified by the modification made by the PRA under section 138A of FSMA, as detailed below:

- Permission to publish a Single Group-Wide Solvency and Financial Condition Report.

The Directors are also responsible for such internal control as they determine is necessary to enable the preparation of a Single Group-Wide Solvency and Financial Condition Report that is free from material misstatement, whether due to fraud or error.

Auditors' Responsibilities for the Audit of the relevant elements of the Single Group-Wide Solvency and Financial Condition Report

It is our responsibility to form an independent opinion as to whether the information subject to audit in the relevant elements of the Single Group-Wide Solvency and Financial Condition Report is prepared, in all material respects, in accordance with the financial reporting provisions of the PRA Rules and Solvency II regulations on which they are based.

Our objectives are to obtain reasonable assurance about whether the relevant elements of the Single Group-Wide Solvency and Financial Condition Report are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but it is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the decision making or the judgement of the users taken on the basis of the Single Group-Wide Solvency and Financial Condition Report.

A further description of our responsibilities for the audit is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

This report, including the opinion, has been prepared for the Board of Directors of the Company in accordance with External Audit rule 2.1 of the Solvency II firms Sector of the PRA Rulebook and for no other purpose. We do not, in providing this report, accept or assume responsibility for any other purpose or to any other party save where expressly agreed by our prior consent in writing.

Report on Other Legal and Regulatory Requirements

Sectoral Information

In our opinion, in accordance with Rule 4.2 of the External Audit Part of the PRA Rulebook, the sectoral information has been properly compiled in accordance with the PRA rules and EU instruments relating to that undertaking from information provided by members of the group and the relevant insurance group undertaking.

Other Information

In accordance with Rule 4.1 (3) of the External Audit Part of the PRA Rulebook for Solvency II firms we are also required to consider whether the Other Information is materially inconsistent with our knowledge obtained in the audit of the Company's statutory financial statements. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

The engagement partner on the audit resulting in this independent auditors' report is Andrew Moore.

PRICEWATERHOUSECOOPERS LLP Chartered Accountants

London

Appendix – relevant elements of the Single Group-Wide Solvency and Financial Condition Report that are not subject to audit

The relevant elements of the Single Group-Wide Solvency and Financial Condition Report that are not subject to audit comprise:

- The following elements of Group template S.23.01.22
 - Rows R0410 to R0440 – Own funds of other financial sectors
- The following elements of Group template S.25.01.22
 - Rows R0500 to R0530 – Capital requirement for other financial sectors (Non-insurance capital requirements) (forming part of the sectoral information)
- Elements of the Narrative Disclosures subject to audit identified as 'unaudited'.

A) Business and Performance

A.1 Business

Name and Legal form of the Undertakings

St. James's Place plc (SJP PLC) is a public limited company incorporated and domiciled in England and Wales (No. 03183415). SJP PLC's registered address is St. James's Place House, 1 Tetbury Road, Cirencester, Gloucestershire GL7 1FP.

St. James's Place UK plc (SJPUK) is a public limited company incorporated and domiciled in England and Wales (No. 02628062). SJP UK's registered address is St. James's Place House, 1 Tetbury Road, Cirencester, Gloucestershire GL7 1FP.

St. James's Place International plc (SJPI) is a public limited company incorporated and domiciled in the Republic of Ireland (No. 185345). SJPI's registered address is Fleming Court, Flemings Place, Dublin 4, Ireland.

Supervision

The Group is regulated as an Insurance Group, subject to the Solvency II Directive (2009/138/EC) of the European Parliament and of the Council (on the supplementary supervision of insurance undertakings in an insurance group), with the Prudential Regulation Authority (PRA) as its lead regulator.

SJPUK is also regulated by the PRA.

SJPI is regulated by the Central Bank of Ireland (CBoI).

The PRA may be contacted through their website at www.bankofengland.co.uk/contact or at 20 Moorgate, London, EC2R 6DA.

The CBoI may be contacted through their website at www.centralbank.ie/contact-us or at PO Box 559, New Wapping St, North Wall Quay, Dublin 1, D02 P656.

A summary of the regulated entities in the Group, and their supervision, is provided in Note 18 on pages 184 and 185 in the Report & Accounts.

Auditors

As reported in the Report & Accounts, the Group's external auditor is PricewaterhouseCoopers LLP, 7 More London Riverside, London SE1 2RT. PricewaterhouseCoopers LLP is also the external auditor for SJPUK.

During 2019 SJPI appointed Grant Thornton, 13-18 City Quay, Dublin 2 as its external auditor.

Group Ownership and Structure

More information about the Group is included in the Report & Accounts in Note 22 on pages 191 to 194.

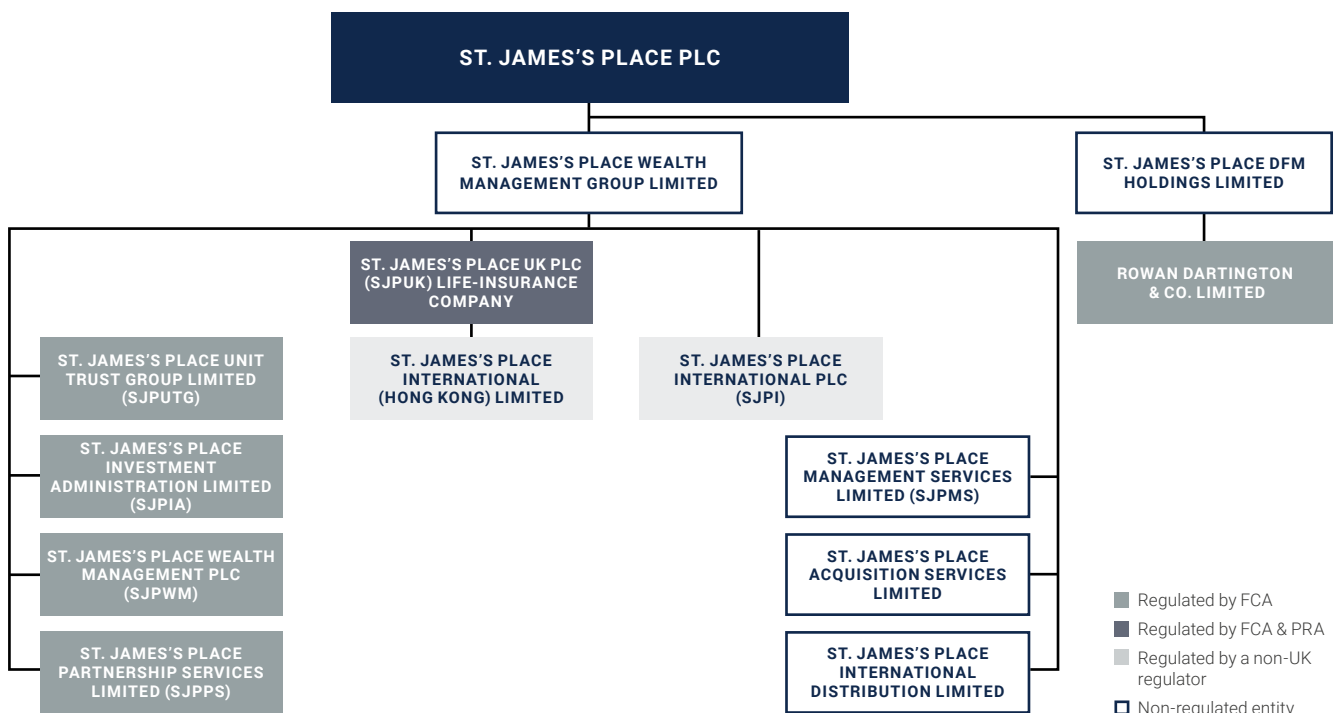

All significant operating companies based in the UK and Ireland, including SJPUK and SJPI, are held as subsidiaries of St. James's Place Wealth Management Group Limited (SJPWMG), which is a wholly owned subsidiary of SJP PLC.

The entire issued ordinary share capital of SJP PLC is listed on the London Stock Exchange and there are no holders of qualifying holdings in the Company. Details of the holders of material holdings are announced to the London Stock Exchange in accordance with the requirements of the Financial Conduct Authority's Disclosure Guidance & Transparency Rules. The Report & Accounts also includes information about the ownership structure and related undertakings, as well as information about distributions to shareholders.

There is no difference between the scope of the Consolidated Financial Statements in the Report & Accounts, and this SFCR. A simplified Group structure diagram is included below.

Business

A description of the whole business of the Group is set out in the Report & Accounts on pages 10 to 37. The business of each of the insurance subsidiaries is predominantly provision of unit-linked savings contracts to retail clients.

A) Business and Performance continued

A.2 Underwriting performance

Our business model is focussed on wealth management, and so the overwhelming majority of our insurance business is unit-linked investment and pensions business. This business has very low levels of insurance risk. Further, we have fully reassured, with external reinsurers, the legacy protection business in SJPUK, and the level of reassurance in SJPI exceeds 75%. As a result, the IFRS net insurance liability exposure for the Group at 31 December 2019 (excluding the unit-linked element and reassurance) was only £3.8million (2018: £4.1 million). Underwriting performance is therefore not a significant driver of the Group's (or the insurance subsidiaries') long-term profitability.

More information about the Group's underwritten business can be found in Note 14 on pages 167 to 169 of the Report & Accounts.

A.3 Investment performance

The wealth management nature of our business means that delivering investment performance for clients is a key performance criterion. However, the unit-linked nature of our insurance business in both SJPUK and SJPI means that the impact of investment performance on profit is second order. In general, positive investment performance of our assets is passed on to clients through an equivalent increase in their benefits. An increase in benefits results in a proportionate increase in Annual Management Charges (AMCs), which contributes to improved business performance, but our matching policy ensures that at all times we have assets to meet our liability to clients.

Excess assets held by the insurance companies (and the Group), above those required to match client unit-liabilities, are used as working capital and also as a prudential buffer. The Group's investment policy requires that these prudential assets should be invested in high credit quality and high liquidity assets, typically AAA rated money-market funds. Consequently, the investment performance of these assets is low, because we are focussing on security not yield.

More information about the investment performance of the assets held to cover our unit liabilities and our shareholder assets is presented in Note 6 on page 155 of our Report & Accounts.

A.4 Performance of other activities

As described above, due to the unit-linked nature of our business, underwriting performance is not a significant driver of business performance at Group level or in the subsidiaries. Instead the Group's performance is primarily dependent on levels of FUM and the resulting level of annual management charges. FUM grows with new business inflows, but is reduced by client encashments. As noted above, investment performance can also impact the level of FUM, either positively or negatively.

Insurance FUM for the Group, as well as for SJPUK and SJPI, have increased during the year, due to positive net inflows and strong investment performance in the unit-linked funds over 2019. This has resulted in increased levels of AMC income compared to the prior year.

Detailed information about the development of FUM in the Group can be found on page 43 of the Report & Accounts, and analysis of how this translates into the performance of the business is expounded on pages 42 to 44 of the same document. Information about the Group's leasing arrangements, which are not in either of the insurance subsidiaries, can be found in Note 10 on page 161 of the Report & Accounts.

B) System of Governance

B.1 General information on the system of governance

The Group

The Group is vertically integrated, allowing it to benefit from the synergies of combining funds management with the provision of advice.

The Group is classified as an insurance group for regulatory purposes. The business performance of each of the regulated entities within the Group is ultimately linked with that of the Group as a whole and the majority of risks impact more than one of the regulated entities. The governance structure is designed to reflect this high level of integration, with the business of the Group being governed by a unified Group board committee structure at holding company level (SJP PLC).

The Board of directors of SJP PLC (the Board), in conjunction with its Executive Board Committee (ExBo), sets the strategic direction for, and risk appetite of, the Group. The Board has delegated certain responsibilities to board committees, whose members are non-executive. The Board reserves certain matters to itself but delegates other matters to ExBo, which is responsible for the Group's operational matters. Each member of ExBo has individual responsibility for a number of divisions within the Group, providing smooth and effective reporting structures and delegations of authority.

Further information on the Board, the Group's System of Governance, Remuneration policies and material transactions with shareholders, is provided in the Corporate Governance Report on pages 78 to 88 and the Report of the Remuneration Committee on pages 102 to 125 in the Report & Accounts.

In line with the Group governance structure, the key functions are organised as Group functions (recognising specific local requirements as appropriate – see SJPI below), ensuring consistent implementation of systems and procedures across the Group. The Chief Actuary reports into the Chief Financial Officer and the Chief Risk Officer to the Group CEO, both of whom are members of the Board of SJP plc. The Compliance function holders report into the Chief Risk Officer, except for those entities where the Chief Risk Officer is also the Compliance function holder (including SJPUK). All are required to report regularly to the Risk and/or Audit Committees, and have unfettered access to the respective committee chairs, ensuring the necessary authority, resources and operational independence to carry out their tasks. The Director – Group Audit reports into the Chief Executive Officer, but, in line with best practice, has direct access to the Audit Committee and the Audit Committee chair.

SJPUK

SJPUK is managed as a Group subsidiary company with a number of key governance, strategy, planning and risk management processes, and, to a large extent, senior operational management, operating at a Group level. However, certain decisions and key matters must be considered directly by the board of SJPUK. Such matters include:

- Those required by law (e.g. matters under the Companies Act 2006 (such as dividend payments) and accounting and auditing legislation (such as approving annual accounts));
- Those required by regulators (e.g. approval of the SII disclosures); and
- Other commercial matters that the directors of SJPUK deem, in view of their fiduciary duties, that they should consider directly (e.g. entering into key agreements).

SJPI

SJPI is similarly managed as a Group subsidiary, with local management supplemented and complemented by support from the Group. As with SJPUK, certain decisions and key matters are reserved to the SJPI board, which comprises independent non-executive, non-executive and executive directors. Overall the board of SJPI aligns the company with the strategic direction and risk appetite set by the Group.

There are, however, specific governance requirements associated with operating an insurance company in Ireland, and as a consequence the company is required to maintain additional distinct 'standalone' governance arrangements, including dedicated audit and risk committees. The Group Board and ExBo interact regularly, as appropriate, with the board of SJPI and its sub-committees.

A number of the key functions are also undertaken locally, with the local Chief Risk Officer being one of the local Executive Directors of the subsidiary, giving good access to the Board to ensure operational independence. As with the Group, the Compliance and MLRO function holders are also local and report into the SJPI Chief Risk Officer and the SJPI board. The Head of Actuarial Function is outsourced to Milliman, Dublin, and the Group's Director of Audit also fulfils the Internal Audit function for SJPI.

Assessment of Adequacy

Our FCA solo-regulated entities transitioned to the Senior Managers & Certification Regime (SM&CR) on 9th December 2019. All UK-regulated entities within the Group now fall under the SM&CR.

During 2019 two non-executive directors were appointed to the Board of St. James's Places Unit Trust Group, reflecting new regulatory requirements arising from the FCA's Asset Management Market Study.

There have been no other material changes in the system of governance during the year, and the Group believes it remains appropriate taking into account the nature, scale and complexity of the risks inherent in the business. In particular, the centralised approach reflects the highly integrated and inter-dependent nature of the Group's activities.

B) System of Governance continued

B.2 Fit and proper requirements

The Group is committed to ensuring that all members of its Boards, key function holders and other senior individuals within the Group (including all Senior Management Function holders and Certified Staff), behave with integrity, honesty and skill, and this commitment is documented in the Fitness and Propriety Policy. The Group has processes in place to ensure appropriate standards of fitness and propriety are met and maintained, both prior to appointment and on an ongoing basis thereafter.

The key elements within the fitness and propriety framework, which apply to each individual, are:

- A Pre-appointment assessment, including: assessment of the individual's knowledge; technical capability; business conduct; behavioural competencies; professional experience and qualifications; receipt of a regulatory reference; and receipt of satisfactory criminal record and credit checks.
- A skills gap analysis, including the transference of any gaps in ability to perform role to a learning and development plan.
- A probationary period and an appropriate induction programme.
- A job description, setting out the significant requirements of their role.
- For Senior Manager Function holders, the maintenance of a Statement of Responsibilities document, listing the core governance and key functions applicable to the role.
- An annual assessment of the fitness and propriety of Senior Manager Function and Certified Function holders, accompanied by a signed confirmation of the individual's understanding of their core governance responsibilities, their fitness and propriety requirements, and an understanding of their ongoing compliance.
- An annual review of performance against objectives and assessment of behaviour against regulatory conduct standards.
- A review of their fitness and propriety, whenever they are impacted by a significant business change or there is a significant change in their responsibilities.

Where a key function is outsourced, the Group ensures that the outsourcing firm carries out appropriate assessments of fitness and propriety for those responsible for the provision of the function and provides evidence of this.

In addition, the Board's Nomination Committee regularly reviews the structure, size and composition of the Board, including skills, knowledge and experience, and makes recommendations to the Board with regard to any changes. When a new appointment is required, the Nomination Committee evaluates the balance of knowledge, skills and experience of the Board members and uses this evaluation to inform the selection of a suitable candidate. Appointments to the role of director and PCF role holder in SJPI are subject to approval by the SJPI board and the CBol.

Records are maintained, and notifications made to the regulators, as and when required.

Further information about the effectiveness and performance of the Group Board is included on page 88 of the Report & Accounts.

B.3 Risk management system including the ORSA

The Risk Management System applies consistently across the Group, and information on this is included on pages 60 to 65 of the Report & Accounts. Additional information on the activity of the Board's Risk Committee can be found on pages 95 to 98.

The Board and insurance entity boards are responsible for assessing their main risks. These are monitored on a regular basis by the Board's Risk Committee, ExBo, the boards of SJPUK and SJPI, and SJPI's Risk Committee.

The Own Risk and Solvency Assessment (ORSA) process is described on pages 60 and 61 of the Report & Accounts, including how it is integrated into the strategic planning, capital management and risk management processes of the Group. The ORSA process was performed simultaneously at Group and material subsidiary (individual insurers) level and recorded in a single document. The ORSA has been used in the decision-making process for this year, which ensures prominence of risk and capital management within this. More information on this can be found on page 97 of the Report & Accounts. The ORSA continues to evolve and strengthen risk management processes throughout the Group.

The ORSA follows an annual cycle which links business activity and strategic objectives, including capital management activities, with comprehensive assessments of the risk the business faces. It uses outputs from the Risk Management processes to inform and agree risk tolerance and own solvency requirements for each insurance entity and at the wider Group level. The ORSA framework consists of:

- Identifying and assessing risks in accordance with the Risk Management Framework;
- Maintaining risk appetite and agreed tolerances with the Board;
- Projecting the capital requirements and expected own funds based on strategic plans and risk profile;
- Assessing the own solvency requirements within each of the regulated insurance entities and for the Group to remain solvent under reasonably foreseeable conditions;
- Monitoring compliance with the SCR and Technical provisions; and
- Reporting conclusions and findings to the Board and regulators.

The ORSA process is directed by the Board, with active engagement from the boards of SJPUK and SJPI. The process comprises of a comprehensive risk assessment; understanding of the risks of each entity and how they are managed; and understanding how those risks might change, in the context of the strategic plan. It also incorporates a quantitative analysis of the capital required, and how this might develop over our planning period (five years).

Where on-going risk monitoring identifies a material change with a notable impact across the Group's operations or confirmation of a fundamental change to our business model which renders the existing assessments invalid, an ad-hoc ORSA Summary Report will be produced.

B) System of Governance continued

B.3 Risk management system including the ORSA continued

The risk profiles of SJPUK and SJPI are consistent with the key risk exposures described in the Report & Accounts, although risks relating to the provision of advice have only an indirect impact on the insurance companies. Solvency requirements for each insurance company are calculated separately and monitored by their respective boards, which are also overseen by the Board. The appropriateness of solvency needs is validated through the following activities:

- Subjecting the financial projections to a series of stresses and scenario tests to measure the sensitivity of our financial position to changes in key modelling assumptions.
- Analysing the impact of material and emerging risks under both reasonably foreseeable and extreme conditions to validate the appropriateness of the control environment and capital buffers.
- Reviewing the assumptions underlying the SCR to assess whether the Standard Formula remains appropriate based on the risk profile of the solo entities.
- Validating the outcome of ORSA processes over time by back-testing historic scenarios and forecasts to actual comparisons. The outcome of this testing is reported in the control documentation prior to the approval of the ORSA report.

B.4 Internal control system

Information about the Internal Control System, including the Control Self-Assessment process that operates consistently across the Group is provided in the Risk Management section of the Report & Accounts on page 60, with an evaluation of the system included in the Report of the Audit Committee on page 94.

For the Group subsidiaries, oversight of SJPUK internal controls is delegated to the Board's Audit Committee. In line with the stand-alone governance that is required, SJPI has a separate audit committee reporting to its board, which maintains oversight of SJPI internal controls.

The System of Internal Control is underpinned by the Internal Control Model which is designed to ensure the Group meets the key objectives of the business model. This is achieved by adopting the "3 Lines of Defence" model for internal control providing a structured approach for defining risk and control responsibilities. During 2019, the reporting line for the Internal Controls team was moved to the Group Risk division from Internal Audit.

St. James's Place plc

Establish three lines of defence to ensure the appropriate management of the Group's risks

First Line: Operational Management

- Responsible for ensuring that appropriate controls are in place to address risks and assessing the effectiveness of these, to enable the Group to meet the aims of its internal control model (including activities undertaken by outsourced relationships).

Second Line: Risk, Internal Controls and Compliance Functions

- Group Risk facilitates, monitors and reports on the implementation by operational management of the risk policies, processes and controls. This is done through regular risk review meetings and control effectiveness reviews (which are reported through our annual control self-assessment process).
- Compliance Assurance provides assurance on the adequacy of relevant processes in the mitigation of the specific risks associated with non-compliance with applicable laws and regulations.

Third Line: Internal Audit

- The Internal Audit team, which is independent of executive management and the first and second lines of defence, provides independent and objective assurance on the internal control model to the Audit Committee through its programme of audit reviews which includes an annual internal control evaluation.

The Group maintains the following permanent and effective teams which collectively comprise the Compliance Function across the Group:

- **Regulatory Guidance** to monitor regulatory developments and business impact; to provide guidance in the compliant development of new products and services and provide guidance during any change to existing products and services;
- **Group Legal** to monitor legislative change;
- **Compliance Assurance** to conduct themed reviews and checks across all divisions to ensure compliant implementation has been maintained;
- **Financial Crime Prevention** to oversee the compliance with the regulatory requirements for financial crime prevention including fraud, anti-money laundering, anti-bribery and anti-corruption;
- **Financial Promotions** to check the adherence of all financial promotions to the relevant regulatory requirements; and
- **Information and Data Security** who oversee data protection.

B) System of Governance continued

B.4 Internal control system continued

In addition, Business Assurance and Field Risk monitor advice and Partner activity as part of the first line of defence.

The activities performed by these functions fall under the oversight of the Group Risk Executive Committee. They operate independently to the business and are responsible for:

- Ensuring adequate policies and procedures are in place to detect any risk of failure to comply with the Group's regulatory obligations;
- Monitoring, and on a regular basis assessing, the adequacy and effectiveness of the measures and procedures noted above; and
- Advising and assisting those responsible for carrying out services and activities to ensure they remain in compliance with all relevant laws, regulations and directives.

Each Group company has a nominated individual responsible for oversight of all compliance matters, including compliance with all relevant regulations and directives. They are responsible for reporting on compliance matters to senior management, and for indicating whether appropriate remedial measures have been taken in the event of any deficiencies.

A Group Compliance Policy is maintained to identify the compliance structure and systems and controls, which is approved by the Group Risk Executive Committee and Board Risk Committee. The policy is reviewed annually or in the event of a material change to the underlying risk profile. It is supported by an annual Compliance Assurance Plan which involves a risk-based review of the business to provide assurance that activities remain within the Group Compliance Policy.

B.5 Internal audit function

The Internal Audit Department is structured as a Group level function with responsibility for providing third line assurance on all entities within the Group. In this respect it supports the Board's Audit Committee and SJPI's audit committee. The function operates in accordance with the standards of the Institute of Internal Auditors and, in the UK, complies with the provisions of the Code of Conduct for Effective Internal Audit in the Financial Services Sector (2017). The Director of Audit reports to the Group Chief Executive and has direct access to the Chairman of the Board's Audit Committee and the Chairman of the SJPI Audit Committee. The powers of the Internal Audit Department are formally outlined in the Audit Charter which is reviewed annually by both audit committees and constitutes the Audit Policy of the Group.

Information about the performance of the Internal Audit Department can be found in the Report of the Audit Committee on pages 93 and 94 of the Report & Accounts.

B.6 Actuarial function

Most of the actuarial work for the Group is undertaken by a centralised team, which produces results for all entities. However, the regulatory responsibility is fulfilled by a named individual for each of the relevant jurisdictions.

The Chief Actuary for the Group and SJPUK is directly employed and reports to the Chief Financial Officer, but has direct access to the Group Board, reporting regularly to the Group Board's Audit and Risk Committees. He is also a Director of SJPUK and SJPI.

The Head of Actuarial Function role for SJPI is outsourced to Milliman, an actuarial consultancy firm based locally in Dublin. This also provides access to local professional knowledge and experience.

In all jurisdictions, the Actuarial Function is linked with the Risk Function, providing support and advice, as well as assistance in generating quantitative analysis to support investigations of financial sensitivities, projections and scenarios.

B.7 Outsourcing

The Group outsources the majority of its fund management, back office and administration processes to reputable third parties in order to focus on its core competencies, and will continue to do so provided that the arrangements do not:

- a) materially impair the quality of the system of governance of the Group;
- b) unduly increase operational risk;
- c) impair the ability of the supervisory authorities to monitor the compliance of the Group with its obligations; and/or
- d) undermine continuous and satisfactory service to clients.

The Group's Material Outsourcing Policy sets out our minimum standards in relation to the selection, due diligence and on-going management of outsourcing relationships.

Outsourcing of fund management is managed through our Investment Management Approach (IMA). More information about the IMA and the process of selecting fund managers is provided on pages 18 and 19 of the Report & Accounts and also in the Report of the Investment Committee that can be found here www.sjp.co.uk/shareholders/reports-presentation-and-webcasts/2020.

The details of our key external outsourcing arrangements as at 31 December 2019 are listed in the tables below:

Back-office and administration service providers

Service Provider	Nature of Outsourced Service	Jurisdiction
Amazon Web Services, Inc.	IT Hosting Services	USA
Capita Life and Pensions Services Ireland Ltd	Administration Services	Ireland
Citibank	Custodian and Dealing Services	UK
DST Financial Services International ¹ Limited	Administration Services	UK
Intellect Design Arena Ltd	IT Development Services	UK
National Trustee & Depositary Services	Trustee Services	UK
State Street Bank and Trust Company	Custodian, Trustee Services and Fund Administration Services	UK

¹ During 2018, DST Financial Services International was acquired by SS&C Technologies Inc, based in the US. The UK operation has now rebranded to SS&C, but the name of the legal entity has not been changed. There were no significant changes to the administration services provided to the Group as a result of this transaction.

B) System of Governance continued

C) Risk Profile

Information about the risk profile of the business, and the principal risks and uncertainties that are inherent within both the Group's business model and the market in which we operate, is included on pages 60 to 65 of the Report & Accounts, in the Risk Management section. These are the risks which could have a material impact on the key strategic outcomes.

Against each of the risks, consideration is given to the level of exposure (likelihood and impact) and the extent to which the risk can be mitigated. This is recorded through local level risk registers and aggregated into a Group-level 'Principal Risks'. The Report & Accounts set out the principal risks, the key strategic areas on which they impact, and the high-level controls to mitigate them.

The principal risks to our business largely remain the same, but the controls and mitigations are under constant review. The impact of Brexit on the economy and customer sentiment remains unclear to our business and the wider economy. In addition, cyber and information security continues to be a developing risk, particularly as techniques to exploit data evolve. However, our analysis and scenario testing has considered worse case scenarios to ensure we are adequately capitalised to severe but plausible impacts from Brexit, Cyber or otherwise.

The design of the Group's product offering on a unit-linked basis was conceived from outset as an attractive client proposition, but also a risk management opportunity. In combination with the corporate investment strategy of fully matching all client liabilities with the relevant assets, all material risks are greatly reduced from this business, apart from operational risk. More information about our Investment Management Approach can be found here www.sjp.co.uk/products-and-services/investment-management-approach.

The governance framework we have implemented is designed to mitigate risk and ensure that assets held within each fund are appropriate for the risk profile and scope of the investment mandate. We also ensure that our investment proposition remains appropriately positioned to meet the requirements of our clients. The comprehensive governance framework includes, amongst other components:

- an Investment Committee comprising both executive and non-executive expertise,
- an internal Investment Risk Committee which provides oversight of fund operations,
- an internal team dedicated to the monitoring of the investment risk aspects of our third-party fund managers; and
- the retained services of a range of specialist independent investment consultants.

Outside the unit-linked funds, the vast majority of shareholder assets above those required to meet client liabilities are invested in highly rated and highly liquid sterling denominated cash-type investments, such as short-dated Government Bonds, Money Market Liquidity Funds and Bank Deposits. Minimum credit ratings, and diversification and liquidity requirements are managed through a Group Credit Risk Policy and a Group Liquidity Risk Policy.

Collectively, this oversight and governance also gives the Group comfort in continued adherence to the prudent person principle.

More information about the Financial Risks in our business can be found in Note 17 on pages 172 to 183 of the Report & Accounts.

C.1 Underwriting risk

The unit-linked nature of our products in both SJPUK and SJPI is designed to mitigate the impact of underwriting risks on the business.

a) Retention

The Group's ability to retain funds under management may be impacted by changes in the economic climate, poor investment performance, competitor activity, or reputational damage to the Group. Higher levels of lapses, whether from a one-off event or from an increase to our assumptions of long-term experience, would reduce the Group's future profitability. However, the unit-linked nature of our business means that the impact on the Group's solvency position is limited, since technical provisions, own funds and capital requirements would all move broadly in line with the lower level of business.

The following table shows the impact of a 10% increase in the assumed level of future lapses:

10% increase in lapses	SJPUK		SJPI		Group	
	2019	2018	2019	2018	2019	2018
Percentage change in:						
Solvency Capital Requirement (SCR)	(6)%	(6)%	(7)%	(8)%	(6)%	(6)%
Own Funds	(4)%	(4)%	0%	1%	(4)%	(3)%
Base Solvency Ratio	117%	125%	144%	141%	132%	143%
Scenario Solvency Ratio	119%	127%	154%	155%	135%	147%

The table shows that increasing the assumed level of future lapses (normally considered a negative result) would counterintuitively lead to a small increase in the Group's current solvency ratio. A similar effect is seen in both SJPUK and SJPI, although the effect is more pronounced in SJPI (reflecting differences in the emergence of profits from the underlying products).

C) Risk Profile continued

C.1 Underwriting risk continued

b) Expenses

Changes in expenses, particularly administration costs, would impact on the Group's future profits. Increasing our long-term assumption of expense levels would increase both our technical provisions and our capital requirements.

The following table shows the impact of a 10% increase in the assumed level of per policy expenses:

10% increase in per-policy expenses	SJPUK		SJPI		Group	
	2019	2018	2019	2018	2019	2018
Percentage change in:						
Solvency Capital Requirement (SCR)	0%	0%	0%	3%	0%	0%
Own Funds	(1)%	(1)%	(7)%	(9)%	(1)%	(2)%
Base Solvency Ratio	117%	125%	144%	141%	132%	143%
Scenario Solvency Ratio	116%	123%	135%	124%	130%	141%

The table shows that an increase in per-policy expenses would lead to a small reduction in the Group's solvency ratio. A similar effect is seen in both SJPUK and SJPI, although the effect is more pronounced in SJPI (again reflecting differences in the emergence of profits from the underlying products).

c) Mortality and Morbidity

The insurance subsidiaries have only small legacy portfolios of protection business which are substantially (or wholly in the case of SJPUK) reassured. The level of mortality and morbidity risk relating to this business is therefore immaterial.

Information about insurance risks in our group, including underwriting and reinsurance, is included in Note 14 on pages 167 to 169 of the Report & Accounts.

C) Risk Profile continued

C.2 Market risk

The unit-linked nature of the Group's products, and our matching strategy, means our corporate exposure to market risk is small and second-order. Similarly, our investment policy for shareholder assets also substantially mitigates market risk.

a) Funds under management

Adverse market movements would reduce the Group's future profitability through lower levels of annual management charges. However, the impact on the Group's current solvency position (and that of SJPUK and SJPI) would be limited, since technical provisions, own funds and capital requirements would all move broadly in line with the lower funds under management.

The following table shows the impact of a 10% reduction in current funds under management:

10% decrease in FUM	SJPUK		SJPI		Group	
	2019	2018	2019	2018	2019	2018
Percentage change in:						
SCR	(10)%	(11)%	(9)%	(7)%	(10)%	(10)%
Own Funds	(11)%	(11)%	(9)%	(9)%	(10)%	(9)%
Base Solvency Ratio	117%	125%	144%	141%	132%	143%
Scenario Solvency Ratio	116%	124%	144%	137%	132%	145%

Note: This table ignores any knock-on effect of lower markets on EIOPA's symmetric equity adjustment.

b) Risk-free rate

Given the nature of the Group's business, changes to the risk-free rate have only a second-order impact on our client liabilities. However, a reduction in the risk-free rate would place more value on future expenses, leading to an increase in technical provisions and capital requirements.

The following table shows the impact of a 1% reduction in the risk-free rate:

1% reduction in risk-free rates	SJPUK		SJPI		Group	
	2019	2018	2019	2018	2019	2018
Percentage change in:						
SCR	0%	0%	1%	6%	0%	0%
Own Funds	(3)%	(3)%	(9)%	(16)%	(2)%	(3)%
Base Solvency Ratio	117%	125%	144%	141%	132%	143%
Scenario Solvency Ratio	114%	122%	130%	111%	129%	139%

Notes:

1 This table ignores any knock-on effect of lower market rates on the Group's Funds Under Management.

2 The risk-free rates under this stress are subject to a floor of 0%.

C.3 Credit risk

In relation to our unit-linked funds credit risk exposure also sits with individual clients, with our oversight functions ensuring that exposures remain within the parameters of the relevant investment mandates. Our investment policy for shareholder assets also means credit risk is minimised (through investing in highly rated and highly liquid cash, cash equivalents and money market funds).

C) Risk Profile continued

C.4 Liquidity risk

Typically, our unit-linked funds are invested in deep and liquid markets, meaning client encashments can easily be matched by underlying asset realisation. However, in stressed scenarios some asset types can become illiquid and have the potential to impact our ability to meet client encashments immediately. Although policy terms and conditions typically include clauses allowing deferral of the encashment, which provides a window for the Group to be able to manage a more orderly solution to clients' encashment requests, our aim is to manage this risk. Such circumstances are rare and so the level of liquidity risk in relation to the unit-linked business is typically very low. The Group monitors its liquidity position and performs stress and scenario testing to ensure liquidity risk remains within the Group's risk appetite.

A small proportion of the linked funds is invested in less liquid asset types, including property and alternative assets. The additional liquidity risk associated with these funds is communicated clearly to clients, and mitigants are in place to manage the liquidity risk.

Our investment policy for shareholder assets also means liquidity risk is minimised and comprehensive cashflow forecasting is conducted continuously to monitor cashflow over the short and medium term, and funding requirements over the long term.

The level of expected profit included in the future premiums within the valuation of technical provisions is zero.

C.5 Operational risk

Many of the principal risks for the Group, identified on pages 62 to 64 of the Report & Accounts are operational risks, reflecting the inherently low risk nature of our unit-linked insurance business, particularly in relation to typical insurance and economic risks.

In relation to our operations, a key feature of our business model is outsourcing of a number of important elements. Whilst outsourcing changes the characteristics of the 'gross' operational risk, our robust governance framework for oversight of material outsourcing arrangements mitigates this exposure, bringing the 'net' exposure in line with our corporate risk appetite.

C.6 Other material risks

All other material risks are described on pages 62 to 64 of the Report & Accounts.

C.7 Any other information

As part of the Group's ongoing risk management approach we perform a range of stress and scenario tests, reporting on the output as part of the Group ORSA. The Group's stress and scenario testing comprises two elements:

- Sensitivity and stress testing of the financial and capital position to changes in key modelling assumptions – for the most part these changes have limited impact on solvency ratios as the insurance assets and liabilities move in line with each other.
- Exploration of plausible adverse scenarios that may arise in the normal course of business – these are derived from the key drivers of business and the schedule of significant risks to the Group. Where possible the Group undertakes quantitative analysis of solvency and profit and loss impacts, augmented with qualitative analysis if modelling is not appropriate. This scenario testing also includes analysis of new risks emerging in the business and our programme of reverse stress testing.

D) Valuation for Solvency Purposes

Under the definition set out in Article 212 1(f) of Directive 2009/138/EC (the Directive), SJP plc is an “insurance holding company”, at the head of an insurance group. The Group valuation exercise therefore reflects the following assessments:

- Valuations for each of the ‘solo’ insurance entities, SJPUK and SJPI, using the SII methodology and basis in line with the SII Regulations; and
- Valuations of other regulated Group companies in line with the appropriate sectoral rules for Own Funds and capital requirement.

The Group result has been prepared using the Accounting Consolidation-based method – Method 1 – as set out in Article 230 of the Directive which means the consolidated balance sheet of the Group has been prepared in accordance with SII Regulations.

In general, the valuation method is aligned with IFRS and so the basis of preparation aligns with the accounting policies outlined in Notes 1 and 2 on pages 142 to 150 of the Report & Accounts. Exceptions to these methods are outlined in the relevant sections below.

Valuation methodology

Assets are valued in line with the accounting policies set out in the Report & Accounts in Note 1 on pages 142 to 149, with the following exceptions:

(A) Participations

Investment in related undertakings (subsidiaries and associates) are valued on an adjusted equity method based on Solvency II valuation of underlying net assets or, for related undertakings other than insurers where this is not practicable, based on IFRS with the deduction of goodwill and intangibles.

(B) Intangible assets

Deferred acquisition costs (DAC) balances and goodwill are valued at zero under SII Regulations and are effectively removed in the preparation of the SII balance sheet.

Intangible assets, other than goodwill, are recognised in the SII balance sheet at a value other than zero only if they can be sold separately and it can be demonstrated that there is a value for the same or similar assets that has been derived from quoted market prices in active markets.

Bespoke computer software tailored to the needs of the company and “off the shelf” software licences that cannot be sold to another user are valued at zero.

(C) Deferred Tax

Deferred taxes are recognised for SII purposes following the recognition principles in IAS 12. This means that for temporary differences the deferred taxes are based on the difference between the value of assets and liabilities on the SII balance sheet and the value of assets and liabilities for tax purposes (tax base).

Deferred taxes that arise from carry-forwards of unused tax credits or tax losses are valued at the value as measured in the IFRS balance sheet and not the SII basis. Further details are included in Note 7 of the Report and Accounts on pages 156 to 158.

(D) Ineligible Assets

In certain circumstances assets may be deemed ineligible under SII, for example due to asset inadmissibility rules under the respective entity sectoral regulatory regimes, and are assessed at zero value. These items have been adjusted for under “Accounting policy differences”.

(E) Reassurance Assets

The reassurance asset reflects any beneficial impact of reassurance in reducing the technical provisions. The SII valuation reflects the methods used to value the underlying technical provisions. More detail is provided in section D2.

There has been no change to the recognition of assets compared to the previous valuation.

Assumptions and judgements

The uncertainty of asset valuations and judgements are as set out in Note 2 of the Report & Accounts on pages 149 and 150. More information about the financial risk of these assets including estimation and uncertainty can be found in Note 17 of the Report & Accounts on pages 172 to 183. Identification of assets fair value measurement by level can also be found in the same Note.

D) Valuation for Solvency Purposes continued

D.1 Assets continued

Reconciliation of Statutory valuation of assets to SII valuation

The following points are the key differences between the statutory and SII valuations:

- **Consolidation of presentation of assets backing unit-linked contracts:** The IFRS basis of preparation adopted in our Group accounts requires detailed analysis on the balance sheet of assets backing unit-linked contracts between different asset types. This approach is not required in the local GAAP methodologies used for the subsidiary companies, nor for SII. The impact is simply a re-presentation of the net assets (i.e. overall impact is neutral), mainly affecting the presentation of the assets with offsetting adjustments to other liabilities.
- **Reassessment of participations (including consolidated unit-trusts):** As noted in (A) above, SII requires that subsidiaries are valued using the equity method. In practice this results in a consolidation of more detailed information presented under IFRS. The overall impact is slightly positive principally as a result of recognition of deferred income in one of the non-insurance subsidiary companies.
- **Accounting policy differences:** As noted in (B) and (C) above, Goodwill, DAC, Deferred Tax Assets and other Intangible Assets are reassessed at zero value under SII. The associated impact on Deferred Tax is reflected in other liabilities.

As noted in (D) above, certain assets may be treated as ineligible under SII and assessed at zero.

As noted in (E) above, the valuation of the reinsurance asset is aligned with the SII valuation of the technical provisions.

There has been no change to the recognition and valuation bases used for assets compared to the previous valuation.

D.2 Technical provisions

Under SII the investment contract benefits and insurance contract liabilities required by IFRS are replaced by an assessment of the technical provisions, comprising the Best Estimate Liability (BEL) and the Risk Margin. This is further split into separate provisions for Unit-linked business and Life and Health. The approach to assessing the technical provisions on a SII basis, together with information about the key sensitivities, is set out below:

Group

	Statutory accounts value (IFRS)	Reallocations	Reassessment of Participations	Accounting Policy Differences	Solvency II value 31/12/2019	Solvency II value 31/12/2018
	£'Million	£'Million	£'Million	£'Million	£'Million	£'Million
Technical provisions						
Unit-linked technical provisions	84,115.7	(93.0)	(126.2)	(83,896.5)	–	–
– BEL	–	–	–	79,208.7	79,208.7	64,456.9
– Risk Margin	–	–	–	1,211.7	1,211.7	987.7

– Risk Margin	–	–	–	0.3	0.3	0.3
Total technical provisions	8,262.3	–	–	(74.8)	8,187.5	6,939.1

The Technical Provisions have increased over 2019, mainly due to the addition of new business and strong investment returns (partially offset by client withdrawals).

D) Valuation for Solvency Purposes continued

D.2 Technical provisions continued

Valuation methodology

Under SII, the technical provisions comprise a Best Estimate Liability (BEL) and a Risk Margin (RM). The valuation methodology is outlined below, and is followed by commentary on the key judgements and assumptions, and on the sensitivity of the valuation to changes in these assumptions.

BEL

The BEL is determined as the discounted value of the projected monthly cashflows involved in fulfilling the liabilities under the in-force business. Broadly, these cashflows comprise:

- **Benefit Outgo:** Projected gross of reinsurance payments to clients on death, illness, surrender, withdrawal or maturity (including unit-related payments, net of client charges).
- **Expense outgo:** The expenses incurred in fulfilling the contracts, including investment advice fees and policy commission.
- **Taxation payments:** Allowance is included within the BEL for tax paid on behalf of clients, e.g. for client tax in the Life Fund in SJPUK, but not for shareholder tax on profits (which is included on the balance sheet as a deferred tax liability instead).
- **Premium payments:** Future premiums (and the additional obligations that they generate) are included in the projected cashflows only if they fall within the 'boundary' of the existing business. Future premiums have only been included within the valuation for the Group's protection business; premiums on investment business, including pensions and the International Regular Investment Plan, are assumed to cease immediately.

Projected cashflows are determined at plan level, or at the more detailed tranche level where this is necessary to capture the policy charges correctly; there is no grouping or aggregation of the input files. No significant simplifications have been used.

The BEL is determined gross of amounts recoverable from reinsurance contracts. The projected amounts recoverable from reinsurance (net of reinsurance premiums) are valued separately, using the same methodology and assumptions as for the BEL, and are held separately on the balance sheet (Reinsurance recoverables on technical provisions). Allowance is included in the valuation of the reinsurance recoverables for the risk of default of the Group's reinsurers.

There is no minimum restriction on the amount of the BEL; policy level liabilities may be less than the current surrender value and in some cases may be negative (where future charges are expected to exceed outgo).

No allowance has been included in the BEL for any of the transitional adjustments set out in the Delegated Acts (i.e. matching or volatility adjustments to the risk-free rate, or transitional adjustments to the overall technical provisions).

Risk Margin

The Risk Margin is determined as the cost of holding the Solvency Capital Requirement (SCR) over the lifetime of the insured portfolio. This cost is determined by applying a prescribed cost of capital rate of 6% p.a. to each year's projected SCR, and then discounting these amounts at the risk-free rate.

The projected SCR figures have been determined using the 'Standard Formula' basis, consistent with the calculation of the initial SCR, but only allowing for risks that are deemed to be non-hedgeable. The Group views the market risk arising from fluctuations in the value of its linked funds as being hedgeable, and therefore no allowance has been made for market risk within the projection of the SCR.

There has been no change to the recognition of liabilities in the Best Estimate Liabilities or Risk Margin compared to the previous valuation.

Judgements

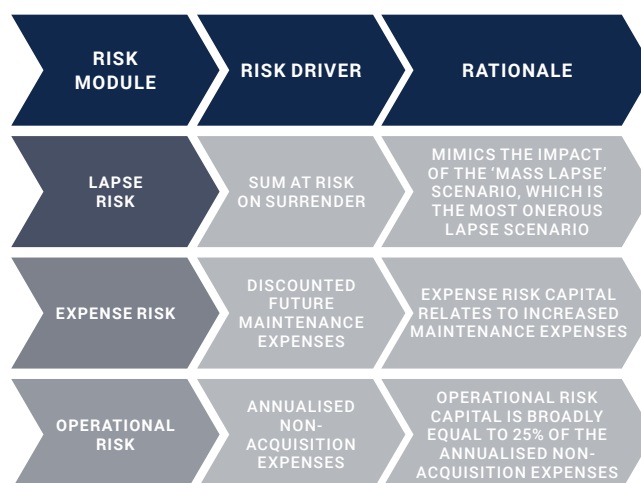

The projection of the monthly cashflows used in the assessment of the technical provisions and risk margin requires management to make judgements. The key judgements are:

Contract Boundaries

The Group's product range includes some products where premiums are paid on a regular basis. Where the purpose of a product is predominantly savings-related, future premiums would typically increase the Own Funds available to meet the SCR. They are treated as being outside the boundary of the existing plans and are not reflected in the valuation. Where the product offers more significant insurance benefits, future premiums, and associated benefits, are assumed to be within the boundary of the existing plans.

Projection of SCR for Risk Margin

Calculation of the Risk Margin requires projection of the SCR. Reflecting the relatively simple nature of the business and risks, a simplified method has been adopted in line with 'Method 1' outlined in Guideline 62 of EIOPA's guidelines on the valuation of technical provisions (i.e. the methodology involving the least simplifications). This uses a series of 'risk drivers' to project how each component of the initial SCR runs off over the lifetime of the portfolio. Separate drivers are used for each risk, selected in each case such that they reflect the expected movement in the underlying capital requirement, as follows:

D) Valuation for Solvency Purposes continued

D.2 Technical provisions continued

Assumptions and Uncertainty

The projection of the monthly cashflows used in the assessment of the technical provisions and risk margin requires management to make assumptions. In general assumptions are based on historical experience, expected future experience, and various other factors that are believed to be reasonable under the circumstances. The assumptions are reviewed on an ongoing basis. The key assumptions are as follows:

Economic assumptions

The assumptions about the risk-free interest rate for all durations are prescribed by the European Insurance and Occupational Pensions Authority (EIOPA). Full detail of the Sterling interest rate curve prescribed for use at 31 December 2019 can be found at www.eiopa.europa.eu/tools-and-data/risk-free-interest-rate-term-structures-0_en. This is used throughout our valuation.

The inflation assumption is required to be consistent with the risk-free rate and to use market data where it is available. We therefore use the implicit price inflation curve published by the Bank of England, available here www.bankofengland.co.uk/statistics/yield-curves. This curve is then increased to reflect our own expectation of higher increases in earnings related expenses.

Sample spot rates for key terms are set out below:

	Rate 2019	Rate 2018
Risk free rate (10 yrs.)	0.91%	1.34%
Inflation rate (10 yrs.)	3.27%	3.35%
Expense inflation SJPUK	3.67%	3.74%
Expense inflation SJPI	4.05%	4.13%

A 1% decrease in the risk-free curve used at all durations would increase the Group technical provisions by £121.0 million (2018: £113.8 million) as there is a higher value placed on future expenses. Group excess of SII assets over technical provisions and SCR (SII free assets) would reduce by £101.7 million (2018: £101.0 million). The sensitivities in each of the insurance entities is shown in the table below:

1% reduction in discount rate	Sensitivities (£m) 31/12/2019			Sensitivities (£m) 31/12/2018		
	SJPUK	SJPI	Group	SJPUK	SJPI	Group
Technical provisions	100.5	20.5	121.0	85.3	28.5	113.8
Solvency II free assets	(81.9)	(19.8)	(101.7)	(68.8)	(32.2)	(101.0)

Persistence (and other Decrement) assumptions

The principal decrement assumptions are for persistency experience. Mortality and morbidity assumptions do not materially impact the valuation, not least due to the high level of reinsurance.

The persistency assumptions are derived from the Group's own experience and reflect our best estimate of experience over the long-term. Where sufficient data does not exist, external industry experience may be used.

In general, the persistency assumptions are unchanged from the previous year. The only exception is for offshore insurance bonds, where the partial lapse rates have been reduced. This reflects an enhancement to the Group's actuarial models to allow explicitly for regular income withdrawals, rather than including them implicitly within the partial lapse rates.

Sample rates for key terms are set out below:

Products (Duration-based)	10 year (ultimate) full lapse rate	10 year (ultimate) partial lapse rate
Unit-linked insurance bonds	4.3%	1.5%
Unit-linked offshore insurance bonds	4.5%	2.7%
		(2018: 4.0%)

Product (Age-based)	Age 40 transfer rate	Age 60 transfer and crystallisation rate	Age 80 transfer and crystallisation rate
Unit-linked pensions – pre crystallisation	3.0%	12.5%	15.0%
Unit-linked pensions – post crystallisation	7.5%	5.0%	25.0%

In addition to these assumptions about client "occasional" behaviour, regular withdrawals are also modelled, based on the amount shown on the policy record. It is also assumed that the whole of the projected investment income is paid out where a client has selected to receive distributions from underlying funds.

A 10% increase in the lapse assumptions used would increase the Group technical provisions by £161.0 million (2018: £127.8 million). However, the Group SII free assets would increase by £39.9 million (2018: £31.3 million) due to reduced capital requirements as the business runs-off more quickly. The sensitivities in each of the insurance entities is shown in the table below:

10% increase in lapses	Sensitivities (£m) 31/12/2019			Sensitivities (£m) 31/12/2018		
	SJPUK	SJPI	Group	SJPUK	SJPI	Group
Technical provisions	160.4	0.6	161.0	128.4	(0.6)	127.8
Solvency II free assets	30.8	9.1	39.9	21.2	10.1	31.3

Expense assumptions

The expense assumptions include allowance for both third-party administration costs and corporate overhead costs incurred in respect of covered business. The corporate costs have been apportioned so that the total maintenance cost represents the anticipated ongoing expenses, including systems development costs, which are expected to arise in future years in meeting the policy servicing requirements of the in-force business.

Sample rates per plan are set out below:

Product	Renewal expense (£ p.a.) 2019	Renewal expense (£ p.a.) 2018
Unit-linked bonds	56.04	54.16
Unit-linked pensions – pre crystallisation	57.27 – 69.59	55.36 – 67.20
Unit-linked pensions – post crystallisation	75.10	72.48
Unit-linked offshore insurance bonds	140.91	140.08

D) Valuation for Solvency Purposes continued

D.2 Technical provisions continued

A 10% increase in the maintenance expense assumptions used would increase the Group technical provisions by £63.1 million (2018: £61.4 million) and Group SII free assets would reduce by £49.8 million (2018: £56.0 million). The sensitivities in each of the insurance entities is shown in the table below:

10% increase in maintenance expenses	Sensitivities (£m) 31/12/2019			Sensitivities (£m) 31/12/2018		
	SJPUK	SJPI	Group	SJPUK	SJPI	Group
Technical provisions	47.1	16.0	63.1	45.0	16.4	61.4
Solvency II free assets	(36.4)	(13.4)	(49.8)	(37.8)	(18.2)	(56.0)

Total other liabilities	153.6	21.8	–	(97.1)	78.3	54.2

D) Valuation for Solvency Purposes continued

D.3 Other liabilities continued

Valuation methodology

Other liabilities are valued in line with the accounting policies set out in Note 1 on pages 142 to 149 of the Report & Accounts, with the following exceptions:

(F) Deferred income reserve

Deferred income reserve (DIR) balances have a value of zero in the SII balance sheet.

Assumptions and judgements

The uncertainty of liability valuations and judgements are as set out in Note 2 of the Report & Accounts on pages 149 and 150. More information about the financial risk of these liabilities including estimation and uncertainty can be found in Note 17 of the Report & Accounts on pages 172 to 183.

Reconciliation of Statutory valuation to SII valuation

The following points are the key differences between the statutory and SII valuations:

- **Consolidation of presentation of assets backing unit-linked contracts:** As in the valuation of assets, the IFRS basis requires detailed analysis of assets backing unit-linked contracts between different asset types. This approach is not required in the local GAAP methodologies used for the subsidiary companies, nor for SII and the overall impact on the net assets across both assets and liabilities is neutral.
- **Reassessment of participations (including consolidated unit-trusts):** The IFRS basis of valuation of the assets requires consolidation of subsidiaries and unit trusts where the Group has a "controlling interest". This is not required under SII. The overall impact is slightly positive principally as a result of recognition of deferred income in two of the non-insurance subsidiary companies.
- **Accounting policy differences:** As noted in (F) above, the DIR balance included in the statutory valuation is reassessed at zero value under SII. (The associated impact on deferred tax is reflected in the net deferred tax movement below).
- **Deferred tax:** As noted in (C) in the valuation of assets, whilst the deferred tax policy is unchanged between the statutory valuation and SII, the impact of accounting policy differences on the valuation, not least the revaluation of the technical provisions, feeds through into a revised deferred tax assessment. In general, in moving to SII there is an increase in the level of net assets, and therefore there is an increase in the deferred tax liability.

There has been no change to the recognition and valuation bases used for Other Liabilities compared to the previous valuation.

D.4 Alternative methods of valuation

Investment properties are stated at fair value, based upon open market values, being the estimated amount for which a property could be exchanged on the date of valuation between a willing buyer and a willing seller in an arm's length transaction after marketing, wherein the parties had each acted knowledgeably, prudently and without compulsion.

The fair values of private credit investments recognised within fixed income securities are principally determined using a combination of: the shadow rating method, which assigns a shadow credit rating to the debt issuing entity and determines an expected yield with reference to observable yields for comparable companies with public credit rating in the loan market; and the weighted average cost of capital (WACC) method, which determines the debt issuing entity's WACC with reference to observable market comparatives. The expected yield and WACC are used as the discount rates to calculate the present value of the expected future cash flows, which is taken to be the fair value.

The fair values of private equity investments are principally determined using a market approach with reference to suitable market comparatives and an income approach using discounted cash flow analysis, which assesses the fair value of each asset based upon its expected future cash flows.

The output of each method for both the private credit and private equity investments results in a range of values, from which the mid-point is selected to be the fair value in the majority of cases. The mid-point would not be selected if further information is known about an investment which cannot be factored into the valuation method used. A weighting is assigned to the values determined following each method to determine the final valuation.

Derivative financial instruments are valued using valuation techniques commonly used by market participants. These consist of discounted cash flow and option pricing models, which typically incorporate observable market data, principally interest rates, basis spreads, foreign exchange rates, equity prices and counterparty credit.

Renewal income assets held by the Group are valued using a discounted cash flow technique and historic lapse rates. No renewal income assets are held by the insurance entities (SJPUK and SJPI).

Details of the assumptions used in arriving at the valuations and their sensitivities, together with other valuation information on Level 2 and 3 Equities and Fixed Interest Securities, are set out in detail in Note 17 of the Report & Accounts on pages 179 to 183.

D.5 Any other information

There are no differences between the valuation bases, methods and assumptions applied at the group level, and those applied at the solo level.

E) Capital Management

E.1 Own Funds

Our Group Capital Management policy requires that each regulated entity should hold Own Funds at least equal to the following:

Company Type	Capital Requirement
EU Insurance companies	SJPUK – 110% of Standard Formula SCR SJPI – 130% of Standard Formula SCR (subject also to holding assets of £180 million for SJPUK (2018: £225 million), and £140 million for SJPI (2018: £130 million) in excess of current unit-linked liabilities, and an underpin of 100% of the capital identified under the Group's Own Solvency Assessment).
Other regulated companies	A multiple of the regulated capital requirement in a range from 150% to 400%

This capital management approach reflects the wealth management nature of our business, and our strategy of matching unit-linked liabilities. The capital requirements set out above have been assessed through our ORSA process, as being sufficient to meet the management risk appetite, which is to hold a margin above the minimum regulatory requirement at all times. The simple nature of the capital requirement means it can be monitored regularly.

The composition of the Own Funds across the three entities is as follows:

	31/12/2019			31/12/2018		
	SJPUK £'Million	SJPI £'Million	Group £'Million	SJPUK £'Million	SJPI £'Million	Group £'Million
Ordinary share capital	110.0	15.6	80.2	110.0	15.6	79.4
Share premium accounts	–	–	182.4	–	–	174.5
Surplus funds	–	–	–	–	–	–
Reconciliation reserve	3,129.5	184.3	3,728.9	2,512.6	140.4	3,108.8
Other financial sectors (unaudited)	–	–	(97.6)	–	–	(95.7)
Net deferred tax assets	–	–	–	–	–	–
Adjustment for ineligible assets	(11.4)	–	(11.4)	(12.7)	–	(12.7)
Basic Own Funds	3,228.1	199.9	3,882.5	2,609.9	156.0	3,254.3
Other financial sectors (unaudited)	–	–	97.6	–	–	95.7
Total eligible own funds to meet Group SCR	3,228.1	199.9	3,980.1	2,609.9	156.0	3,350.0
Foreseeable dividend	200.0	–	166.9	210.0	–	157.4
Solvency II Own Funds ¹	3,428.1	199.9	4,147.0	2,819.9	156.0	3,507.4
Adjustment for ineligible assets	11.4	0.8	12.2	12.7	0.6	13.4
Solvency II excess of assets over liabilities	3,439.5	200.7	4,159.2	2,832.6	156.6	3,520.8

¹ Before payment of final dividends, as presented in Group Report and Accounts.

The reconciliation reserve in each entity is mostly comprised of the value of future profits expected to emerge from the in-force business.

The table below reconciles the equity in the financial statements and the SII excess over liabilities:

	31/12/2019			31/12/2018		
	SJPUK £'Million	SJPI £'Million	Group £'Million	SJPUK £'Million	SJPI £'Million	Group £'Million
Statutory accounts excess of assets over liabilities	356.8	98.4	947.2	435.2	83.9	1,019.1
Reassessment of participations	(1.7)	–	0.1	–	–	–
Accounting policy differences:						
– Assets	(352.6)	(69.6)	(563.5)	(405.1)	(74.5)	(628.4)
– Technical Provisions	3,411.1	74.8	3,485.9	2,665.7	43.2	2,708.9
– Other Liabilities	25.9	97.1	289.5	136.8	104.0	421.2
Solvency II excess of assets over liabilities	3,439.5	200.7	4,159.2	2,832.6	156.6	3,520.8

Further information on these differences is in sections D.1, D.2 and D.3 of this report.

The only changes in the insurance entities' Own Funds were due to emergence of profit, offset by a dividend of £210 million (2018: £315 million) settled from SJPUK and £0 million (2018: £25 million) settled from SJPI to the Group during the year.

The Own Funds of the Group were impacted by the emergence of profit from Group companies during the year and also by the payment of dividends totalling £256.0 million (2018: £243.0 million) during the year and exercise of share options.

E) Capital Management continued

E.1 Own Funds continued

Our insurance entities hold only Tier 1 funds and so there are no restrictions on the availability or fungibility of the Own Funds to meet liabilities, and there is no reliance on related undertakings. The Group Own Funds also comprises only Tier 1.

For the non-insurance companies in the Group that are also subject to financial regulation, only surplus assets above the regulatory capital requirement will be fungible. However, as noted above, management has established an additional capital requirement which acts as a further constraint on distribution of capital from these entities. There are no other restrictions on fungibility or transferability of assets between group companies.

The whole amount of the Own Funds, which is all Tier 1, is eligible to cover the SCR and the MCR.

There are no amounts within the Own Funds that arise from transitional arrangements, and no ancillary Own Funds.

E.2 Solvency Capital Requirement & Minimum Capital Requirement

The SCRs and Minimum Capital Requirements (MCRs) for the regulated insurance undertakings (SJPUK and SJPI) have been determined using the 'standard formula' approach set out in the Directive. No material simplified methods or undertaking specific parameters have been used in this assessment.

The Group result has been prepared using the Accounting Consolidation-based method – Method 1 – as set out in Article 230 of the Directive which means the consolidated capital requirement of the Group has been prepared in accordance with SII Regulations.

The assessment of equity risk has been based on the change in the net asset value arising from the prescribed stress test, with no credit taken for the transitional provisions applying to equities purchased before 1 January 2016.

The resulting capital requirements at 31 December 2019 are summarised in the following table:

	Capital Requirements (£m)				Group
	SJPUK	SJPI	Other	Diversification	
Market Risks					
Interest Rate Risk	38.2	1.8	–	(11.3)	28.7
Spread Risk	228.7	11.3	–	–	240.0
Equity Risk	1,416.7	70.6	–	(0.1)	1,487.2
Property Risk	32.1	0.1	–	–	32.2
Currency Risk	922.6	51.7	–	–	974.3
Diversification	(572.8)	(29.2)	–	9.1	(592.9)

Total MCR	731.4	57.5	–	–	788.9
MCR as % of SCR	25%	41%			25%

E) Capital Management continued

E.2 Solvency Capital Requirement & Minimum Capital Requirement continued

For comparison, the capital requirements at 31 December 2018 were as follows:

	Capital Requirements (£m)				Group
	SJPUK	SJPI	Other	Group Diversification	
Market Risks					
Interest Rate Risk	58.9	1.5	–	(10.5)	49.9
Spread Risk	225.9	10.4	–	–	236.3
Equity Risk	958.4	48.1	–	(0.1)	1,006.4
Property Risk	29.0	0.2	–	–	29.2
Currency Risk	695.2	39.5	–	–	734.7
Diversification	(460.0)	(22.1)	–	8.3	(473.8)
Total Market Risk Capital	1,507.4	77.6	–	(2.3)	1,582.7
Counterparty Default Risk Capital	7.6	0.6	–	–	8.2
Life & Health Underwriting Risk					
Mortality Risk	40.8	5.5	–	–	46.3
Disability-Morbidity Risk	0.9	1.2	–	–	2.1
Lapse Risk	1,486.4	49.5	–	–	1,535.9
Expenses Risk	130.1	35.5	–	–	165.6
Catastrophe Risk	8.2	0.8	–	–	9.0
Diversification	(106.4)	(16.9)	–	(5.2)	(128.5)
Total Life & Health Underwriting Risk Capital	1,560.0	75.6	–	(5.2)	1,630.4
Diversification	(648.1)	(32.7)	–	1.6	(679.2)
Basic SCR	2,426.9	121.1	–	(5.9)	2,542.1
Operational Risk	27.6	2.6	–	–	30.2
Loss absorbing capacity of deferred taxes	(195.1)	(13.0)	–	0.5	(207.6)
Sectoral Requirement for Non-Insurance (unaudited)	–	–	82.6	–	82.6
Total SCR	2,259.4	110.7	82.6	(5.4)	2,447.3
Total MCR	564.9	48.3	–	–	613.2
MCR as % of SCR	25%	44%			25%

The Group SCR has a floor equal to the sum of the MCR of the 2 insurance entities of £788.9 million (2018: £613.2 million).

The inputs used to calculate the MCR and the floor of the MCR for the solo entities can be found in the QRTs in the appendix.

There are no material diversification effects at Group level as SJPUK dominates the consolidated result and the risk profiles of SJPUK and SJPI are similar. Neither the Group nor either of the EU insurance subsidiaries is subject to any level of supervisory capital add-on.

Growth in the capital requirement generally moves in line with FUM. However, the Group's total SCR has grown by more than the increase in the underlying FUM during 2019. This reflects an increase in the equity risk capital requirements in SJPUK and SJPI, which has arisen due to the higher level of 'symmetric adjustment' included in EIOPA's prescribed stress at 31 December 2019.

The final amount of the SCR is subject to supervisory assessment.

E.3 Use of duration based equity risk sub-module in the calculation of SCR

The duration based equity risk sub module has not been used in the calculation of the SCR for either the Group or the individual subsidiaries.

E.4 Difference between Standard Formula and any internal model used

No internal or partial internal model has been used in the calculation of the SCR.

E.5 Non-compliance with the MCR and non-compliance with the SCR

The Group and the individual subsidiaries have maintained Own Funds in excess of the MCR and SCR throughout the period.

Appendix: Quantitative Reporting Templates

The following pages contain QRTs for the Group, SJPUK and SJPI.

All figures are presented in thousands of Pounds with the exception of ratios that are in decimal. Please note that totals may differ from the component parts due to rounding. All items disclosed are consistent with the information provided to the regulators privately.

The following Group QRTs are provided:

- (a) S.02.01.02, balance sheet information
- (b) S.05.01.02, information on premiums, claims and expenses, using the valuation and recognition principles used in the consolidated financial statements
- (c) S.23.01.22, information on Own Funds, including basic Own Funds
- (d) S.25.01.22, specifying information on the SCR, calculated using the standard formula
- (e) S.32.01.22, information on the undertakings in the scope of the Group

S.05.02.01, information on premiums, claims and expenses by country is not required as more than 90% is written in the UK.

The following Solo QRTs are provided:

- (f) S.02.01.02, balance sheet information
- (g) S.05.01.02, information on premiums, claims and expenses, using the valuation and recognition principles used in the consolidated financial statements
- (h) S.05.02.01, information on premiums, claims and expenses by country for SJPI only
- (i) S.12.01.02, information on the technical provisions relating to life insurance and health insurance
- (j) S.23.01.22, information on Own Funds, including basic Own Funds
- (k) S.25.01.22, information on the SCR, calculated using the standard formula
- (l) S.28.01.01, specifying the MCR for insurance

Glossary of Terms

Best estimate liabilities (BEL)

The expected, or 'best estimate', value of the Group's obligations to clients under the Solvency II regulations.

Central Bank of Ireland (CBoI)

The CBoI is responsible for the prudential regulation of deposit taking institutions, insurers and major investment firms registered in Ireland, including St. James's Place International plc.

Deferred acquisition costs (DAC)

An intangible asset required to be established through the application of IFRS to our long-term business. Under the SII regulations, intangible assets such as the DAC asset are removed.

Deferred Income (DIR)

Deferred income which arises from the requirement that initial charges on long-term financial instruments should only be recognised over the lifetime of the business. Under the SII regulations, intangible liabilities such as the DIR asset are removed.

Funds under Management (FUM)

Represents all assets actively managed or administered by or on behalf of the Group.

Group

The Group refers to St. James's Place plc, together with its subsidiaries as listed in Note 22 of the Report and Accounts (on pages 191 to 194).

International Financial Reporting Standards (IFRS)

These are the accounting regulations designed to ensure comparable preparation and disclosure of statements of financial position, and are the standards that all publicly listed companies in the European Union are required to use.

Investment Management Approach (IMA)

The IMA is how the Group manages clients' investments. It is managed by the St. James's Place Investment Committee, which in turn is advised by respected independent investment research consultancies. The Investment Committee is responsible for identifying fund managers for our funds, selecting from fund management firms all around the world. They are also responsible for monitoring the performance of our fund managers and, if circumstances should change and it becomes necessary, then they are responsible for changing the fund manager as well.

Minimum Capital Requirement (MCR)

The MCR is the minimum level of security required under the Solvency II regulations for EU insurance entities.

Own Risk and Solvency Assessment (ORSA)

The ORSA is a comprehensive risk assessment, bringing together an understanding of the risks that the Group faces, and how these risks may change in the future. It also includes quantitative analysis of the capital required, and how it might develop over our planning period (5 years).

Prudential Regulatory Authority (PRA)

The PRA is a part of the Bank of England and is responsible for the prudential regulation of deposit taking institutions, insurers and major investment firms. The PRA has two statutory objectives: to promote the safety and soundness of these firms and, specifically for insurers, to contribute to the securing of an appropriate degree of protection for policyholders.

The PRA is the lead supervisor for the Group under the Solvency II regulations.

Quantitative Reporting Templates (QRT)

Standardised templates providing data relating to the Group's business and to the Solvency II valuation, including data relating to the assessment of technical provisions and capital requirements as well as the Solvency II Balance Sheet.

Risk Margin

The Risk Margin is determined as the cost of holding the Solvency Capital Requirement (SCR) over the lifetime of the insured portfolio.

Senior Managers and Certification Regime (SM&CR)

The SM&CR applies to all PRA and FCA regulated firms within the Group.

This regime sets out minimum standards of individual behaviour that apply in the financial services sector, as well as more specific requirements for senior managers and other employees who have key roles within the organisation.

Solvency Capital Requirement (SCR)

The SCR is the amount of risk-based capital required under the Solvency II regulations to ensure that the insurance entities can meet their obligations over the next 12 months with a probability of at least 99.5% (i.e. a 1 in 200-year scenario).

Solvency II (SII)

Insurance regulations designed to harmonise EU insurance regulation, which became effective on 1 January 2016. The key concerns of the regulation are to ensure robust risk management in insurance companies and to use that understanding of risk to help determine the right amount of capital for European insurance companies to hold to ensure their ongoing viability in all but the most severe stressed scenarios.
